

## APC Relief Response in Chile (04-25-2010)

Thanks to the AWB help and the training that Micah O'Neal and John Convey provided us, APC has been able to cover a wide section of the damaged area. Our volunteers travel during the weekends mostly in all of our venues and we have been able to train some local acupuncturist to run a couple of the most far away venues.

The reaction from the volunteers and patients has been amazing. Everybody is grateful about the experience and it defenetly has been an important help in the relief of trauma in the most affected areas.

At the moment we are working on the survey data that we have been getting back from the volunteers and to get more funds to maintain open new venues and maintain the opened ones.
